HireBuddy

One prompt. Relevant jobs. Verified next steps.

Accessible job discovery and application preparation for blind and low-vision job seekers in Malaysia.

USER REQUEST

Find suitable work that fits my skills, travel, pay and accessibility needs.

LIVE WEB APP

WORKBUDDY + MCP

VERIFY BEFORE DELIVER

One prompt captures the user's requirements

A job search must respect practical needs—not just match keywords.

NADIA • SAMPLE JOB SEEKER

"I'm blind and use NVDA. I live in Subang Jaya and take the LRT. I worked in customer service, speak English and Malay, and need weekday work from 9 to 5, at least RM12/hour. Phone interviews please."

EXTRACTED USER REQUIREMENTS

Accessibility	Blind • NVDA screen reader
Location	Subang Jaya • LRT access
Experience	Customer service • bilingual
Availability	Weekdays • 9 AM–5 PM
Pay and contact	At least RM12/hr • phone preferred

What HireBuddy finds, checks and prepares

WorkBuddy searches external listings; HireBuddy evaluates and prepares verified results.

01

UNDERSTAND

Read the request and save the job-seeker profile.

02

FIND

WorkBuddy searches JobStreet, Indeed, Hiredly or Maukerja for suitable jobs, assessing pay, skills, shifts and accessibility.

03

PREPARE

Produce suitable matches.

04

VERIFY

Verify job requirements against the job-seeker profile, determine suitability.

05

DELIVER

Submit the application email after the job-seeker selects the job and approves the email.

External listings → recommendations and drafts only. No automatic application submission or interview booking.

WorkBuddy runs HireBuddy's verified workflow

Execution roles are separate, and each result has a clear owner.

WORKBUDDY

- Skill / MCP client
- Searches external job sites
- Runs HireBuddy steps

HIREBUDDY AGENT

- Plans and calls tools
- Checks job suitability
- Verifies and fixes problems

VERIFIED OUTPUTS

- Suitable job matches
- Application drafts
- Selected application email
- Verification results and run log

Deployment: public Render web app • WorkBuddy bridge • optional Telegram hand-off

7 checks for WorkBuddy-supplied listings

Two checks always run; five more conditions are covered by the external-listing checks.

ALWAYS RUN

01 Profile saved

02 Jobs checked successfully

These apply even when no external listings are supplied.

WHEN EXTERNAL LISTINGS ARE PROVIDED

03 Every supplied listing is reviewed

04 Recommended jobs meet legal and requested pay AND do not require sight

05 Suitable listings have drafts covering unanswered questions

06 Drafts ask about screen-reader support unless already confirmed

07 No application is sent to external employers automatically

7 total code-level checks — the wage and sight conditions are combined into one check.

Show the workflow—not just the website

Demonstrate the actual WorkBuddy execution, the resulting drafts, and the verification log.

1 PROMPT

Enter Nadia's job requirements.

2 EXECUTE

WorkBuddy searches listings and calls HireBuddy.

3 REVIEW

Show why matches qualify and why others are excluded.

4 DELIVER

Open application drafts, selected email and verification log.

What to claim: verified job matches and prepared applications—not automatically submitted applications or booked interviews.
